Contents

Part 1 October 1995

S. A. BRADLEY, W. KING AND C. W. ALLEN. Preface, 1

M. M. J. TREACY AND J. M. GIBSON. Atomic contrast transfer in annular darkfield images, 2

H. MÜLLEJANS AND J. BRULEY. Electron energy-loss near-edge structure of internal interfaces by spatial difference spectroscopy, 12

J. BRULEY, D. B. WILLIAMS, J. J. CUOMO AND D. P. PAPPAS. Quantitative near-edge structure analysis of diamond-like carbon in the electron microscope using a two-window method, 22

H. MORI AND H. YASUDA. Observation by TEM of spontaneous alloying in nanometre-sized atom clusters in the Au–Al system, 33

E. VÖLKL, L. F. ALLARD AND B. FROST. A software package for the processing and reconstruction of electron holograms, 39

A. J. SCHWARTZ, S. PACIORNIK, R. KILAAS AND L. E. TANNER. Quantification of the modulated structures in TiPdCr alloys, 51

S. Q. XIAO, E. JOHNSON, S. HINDERBERGER, A. JOHANSEN, K. K. BOURDELLE AND U. DAHMEN. *In-situ* high-resolution electron microscopy observations of nanometre-sized Pb inclusions in Al near their melting point, 61

C. K. KIM AND R. C. O'HANDLEY. New mechanism for field-induced anisotropy of cobalt-rich amorphous alloys, 70

H. YASUDA AND H. MORI. Analysis of bonding state in pure and gold-implanted amorphous SiC by a combination of UHVEM and AES, 80

J. SILCOX, C. ALLEN AND S. BRADLEY. Summary of a Group Discussion on the Future of Electron Microscopy at the Fifth Conference on Frontiers of Electron Microscopy in Materials Science (Oakland, CA, 21–24 June 1994), 87

Book reviews, 90

Part 2 November 1995

J. HONGPAISAN AND G. M. ROOMANS. Use of *post mortem* and *in vivo* tissue specimens for X-ray microanalysis, 93

O. S. HEAVENS. Use of the approximations in cell studies by total internal reflection fluorescence microscopy (TIRF), 106

K. D. NISWENDER, S. M. BLACKMAN, L. ROHDE, M. A. MAGNUSON AND D. W. PISTON. Quantitative imaging of green fluorescent protein in cultured cells: comparison of microscopic techniques, use in fusion proteins and detection limits, 109

D. A. ORLOVICH AND A. E. ASHFORD. X-ray microanalysis of ion distribution in frozen salt/dextran droplets after freeze-substitution and embedding in anhydrous conditions, 117

Contents

Book reviews, 90

Part 2 November 1995

J. HONGPAISAN AND G. M. ROOMANS. Use of *post mortem* and *in vivo* tissue specimens for X-ray microanalysis, 93

O. S. HEAVENS. Use of the approximations in cell studies by total internal reflection fluorescence microscopy (TIRF), 106

K. D. NISWENDER, S. M. BLACKMAN, L. ROHDE, M. A. MAGNUSON AND D. W. PISTON. Quantitative imaging of green fluorescent protein in cultured cells: comparison of microscopic techniques, use in fusion proteins and detection limits, 109

D. A. ORLOVICH AND A. E. ASHFORD. X-ray microanalysis of ion distribution in frozen salt/dextran droplets after freeze-substitution and embedding in anhydrous conditions, 117

R. H. NEWTON, J. P. HAFFEGEE AND M. W. HO. Polarized light microscopy of weakly birefringent biological specimens, 127

L. S. CUTTS, P. A. ROBERTS, J. ADLER, M. C. DAVIES AND C. D. MELIA. Determination of localized diffusion coefficients in gels using confocal scanning laser microscopy, 131

R. OLDENBOURG AND G. MEI. New polarized light microscope with precision universal compensator, 140

A. ENTWISTLE. The effects of total internal reflection on the spread function along the axis in confocal microscopy, 148

L. FRANK AND F. MATĚJKA. Edge effect in Auger electron microscopy: quantification of the effect, 158

K. PROPSTRA AND N. F. VAN HULST. Polarization contrast in photon scanning tunnelling microscopy combined with atomic force microscopy, 165

G. R. BUSHELL, G. S. WATSON, S. A. HOLT AND S. MYHRA. Imaging and nano-dissection of tobacco mosaic virus by atomic force microscopy, 174

Short technical notes

D. A. HOWELL, J. W. HECKMAN JR AND M. A. CRIMP. Preparation of metal multilayer TEM cross-sections using ultramicrotomy, 182

Z. SHAO AND A. P. SOMLYO. Stereo representation of atomic force micrographs: optimizing the view, 186

Erratum, 189

Rapid publication

S. W. HELL, M. SCHRADER, K. BAHLMANN, F. MEINECKE, J. R. LAKOWICZ AND I. GRYCZYNSKI. Stimulated emission on microscopic scale: light quenching of Pyridine 2 using a Ti:sapphire laser, RP1

Part 3 December 1995

M. STOBBS. Introduction, 191

A. HOWIE. Recent developments in secondary electron imaging, 192

P. E. BATSON. Near-atomic-resolution EELS in silicon–germanium alloys, 204

G. A. BOTTON, C. C. APPEL, A. HORSEWELL AND W. M. STOBBS. Quantification of the EELS near-edge structures to study Mn doping in oxides, 211

G. A. BOTTON, G. L'ESPERANCE, C. E. GALLERNEAULT AND M. D. BALL. Volume fraction measurement of dispersoids in a thin foil by parallel energy-loss spectroscopy: development and assessment of the technique, 217

N. D. BROWNING AND S. J. PENNYCOOK. Atomic-resolution electron energy-loss spectroscopy in the scanning transmission electron microscope, 230

R. BRYDSON. Probing the local structure and bonding at interfaces and defects using EELS in the TEM, 238

A. J. CRAVEN. The electron energy-loss near-edge structure (ELNES) on N K-edges from the transition metal mononitrides with the rock-salt structure and its comparison with that on the C K-edges from the corresponding transition metal monocarbides, 250

R. E. DUNIN-BORKOWSKI, C. B. BOOTHROYD, S. J. LLOYD AND W. M. STOBBS. Energy-filtered Fresnel contrast analysis of Fe/Cu multilayers, 263

O. L. KRIVANEK, M. K. KUNDMANN AND K. KIMOTO. Spatial resolution in EFTEM elemental maps, 277

S. J. LLOYD, G. A. BOTTON AND W. M. STOBBS. Changes in the iron white-line ratio in the electron energy-loss spectrum of iron–copper multilayers, 288

L. MARTÍN MORENO, P. M. BELL AND J. B. PENDRY. Energy losses in colloidal metals, 294

D. ÖZKAYA, J. YUAN, L. M. BROWN AND P. E. J. FLEWITT. Segregation-induced hole drilling at grain boundaries, 300

D. J. WALLIS, P. H. GASKELL AND R. BRYDSON. Oxygen K near-edge spectra of amorphous silicon suboxides, 307

J. YUAN, L. M. BROWN, J. WALMSLEY AND S. B. FISHER. Observations of changing fine structure in nanoscale EELS analysis of grain boundaries in stainless steels, 313

Book review, 326

Erratum, 327

Author/keyword index, 328
